

UNIVERSAL TRACTOR HYDRAULIC FLUID

Agripro™ UTHF

All-season Hydraulic and Transmission Fluid

Agripro™ Universal Tractor Hydraulic Fluid

Superior Protection to Maximize Performance and Service Life

Hard-working hydraulic systems and transmissions need a lubricant that works equally as hard: Agripro Universal Tractor Hydraulic Fluid SAE 15W-20. This all-season formulation is made for the special requirements of most farm tractors, harvesters and implements, as well as certain construction machinery.

Blended using premium base stocks and field proven additive technology, Agripro UTHF is designed to increase performance, extend equipment life and extend drain intervals through exceptional:

- Wear and extreme pressure protection
- Oxidation and corrosion resistance
- Friction control
- Moisture dispersion capability
- Foam protection

What's more, this multi-purpose lubricant demonstrates excellent fluidity at low temperatures and superior stability at high temperatures. Plus, it contributes to overall system cleanliness. All this with the simplicity of a single fluid that offers supply chain economies.

A tractor or other farm equipment is the workhorse of an operation. Make sure it delivers the powerhouse performance it was designed for. Count on Agripro UTHF for outstanding protection day after day, season after season.

Protection From Wear and Extreme Pressure

Advanced additive chemistry protects critical components including gears, bearings and valves against harmful contaminants and pressure that can cause scoring and wear.

Oxidation and Corrosion Resistance

Special oxidation inhibitors help prevent Agripro UTHF from degrading at high temperatures, hindering the development of acids that lead to rust and corrosion. In addition, copper activity is minimized, which protects hydraulic pumps from corrosion.

Friction Control

Agripro UTHF features a superior friction system to minimize wet brake chatter, support braking capacity, eliminate transmission slippage and promote smooth clutch operation.

Moisture Dispersion Capability

Even if water contamination occurs, Agripro UTHF continues to maintain the same high level of protection from corrosion, rust and sediment for critical parts.

Foam Protection

Outstanding antifoam properties inhibit fluid overflow and equipment wear, and promote smoother braking and cooler operation.

Demonstrated Performance...

You Can Depend On

Specifications Agripro UTHF SAE 15W-20 meets or exceeds these performance requirements:

- AGCO-ALLIS
- ALLIS-CHALMERS
- DUETZ-ALLIS
- Allison C3, C4
- Case
- Caterpillar TO-2
- Denison HF-0, HF-1, HF-2
- John Deere J20C/D, A/B, J14B
- Kubota UDT Fluid
- Landini
- New Holland
- Ford
- Sperry-Vickers
- Versatile
- Fiat
- Renk Doromat 873, 874 A/B
- Sundstrand Hydraulics
- Volvo WB-101
- ZF Transmissions
